B.tech in Computer Science

University Of Mumbai • GPA: 7.8   Mumbai • 07/2019 - 07/2023

PROJECTS

Chat app

Description:

Developed a real-time chat application using Socket.IO to facilitate instant communication between users.

Can contact the user using similar application to chat.

Notified the existing user if a new user join the app.

User can Create a personal chat room to chat with other users whom the host allow to get in. Support Audio and text chat only.

Implemented features such as private messaging, user authentication, and message notifications for an immersive chatting experience.

Food Delivery App

Description:

Contributed to the development of a food delivery application, focusing on enhancing user experience and optimizing performance.

User can contact the delivery person directly on app through chat or can make a call.

Also if user order the food and canceled it at the time of delivery has to pay penalties that will get added in next order.

User can connect to CSE on call directly from the app to raise dispute against food or delivery agent.

Delivery Agent can Navigate the customers address within the App.

Integrated features like real-time order tracking, payment gateways, and seamless navigation to streamline the food ordering process.

Ecommerce Website with Admin panel & Payment Gateway

Description:

Led the development of an e-commerce website with an intuitive admin panel and integrated payment gateway functionality.

Admin panel: Through Admin panel admin can list new product also can list the discount on product can tract the number of order. on particular product etc.

User experience: User can search the product by applying filter such as Discount, Color, Price range, Delivery time,Payment mode also can choose the payment mode Online or COD. etc

Designed to provide a seamsless shopping experience, the platform featured user-friendly navigation, secure payment processing, and efficient order management capabilities.

Personal Portfolio

https://github.com/Billionaire-coder/Its-Me

Designed and developed a personal portfolio website to showcase projects, skills, and experiences. Implemented responsive design principles to create an engaging and visually appealing online presence.

Other small project

To build a problem-solving approach, develop logical thinking skills, and gain a deeper understanding of how code works, as well as to better comprehend the latest technologies and market trends.
